Face to Face

Twin Electrical Engineering students, Alex (r) and Michael (l) Bronstein, continue to make international headlines with Computer Science Prof. Ron Kimmel for their 3D Facial Recognition research. Kimmel has been invited to present the innovation at the first global online conference and trade show on anti-terrorism, security and defense technologies, <http://www.tatevent.com/> where it will feature prominently.

Bronstein**

The twins are to serve on the advisory board of the Biometrics Council <http://www.biometricscouncil.org/>. In addition, the American Academy of Achievement <http://www.achievement.org/> selected the brothers to join the ranks of "the best that the world has to offer at the dawn of the new millennium," and participate in the International Achievement Summit in Washington, D.C. attended by 200 outstanding students from 40 countries, and eminent leaders who have shaped the modern world.

Kimmel and the Bronsteins will receive a Hershel Rich Technion Innovation Award at the 2003 Board of Governors meeting.
